

# **SAS SELECTS AYECKA FOR SATELLITE USER TERMINALS**

---

Sky and Space Company Limited ('**SAS**' or the '**Company**') announces that, following a competitive tender process, it has appointed AYECKA Communication Systems ('**AYECKA**'), a leading provider of satellite communication payloads and ground networks, to provide the Company with user satellite terminals.

Following its successful recapitalisation, SAS is in the production process for an additional 16 satellites as part of its 400-strong IoT communication nano-satellite constellation, with the objective of commercial services being fully operational and generating revenue as early as Q1 2023.

The SAS user terminal, to be developed and manufactured by AYECKA, is a multi-functional high reliability modem with integrated antenna and able to support high speed narrow band data rates.

SAS already has some 55 customers who will procure the ground terminals in order to facilitate satellite access by their end users.

The Company looks forward to continued collaboration with AYECKA.

### **ABOUT SKY AND SPACE COMPANY LIMITED**

Sky and Space Company Limited is a satellite company regulated by the UK Space Agency with aerospace, satellite, and software industry expertise.

The Company's core business is to provide communications infrastructure and services based on nanosatellite technology and deploy highly sophisticated software systems that launch, maintain orbit, control, and manage global communication networks in space.

The Company was the first to build and operate a nanosatellite based commercial telecom network. It currently benefits from over 50 agreements with future customers, award winning technology and many nanosatellite world firsts including propulsionless formation flying and inter satellite communications.

### **ABOUT AYECKA**

Established in 2005, privately held AYECKA Communication Systems Ltd., is a leading provider of innovative and cost-effective solutions for satellite link-based IP and video delivery. The company's SATCOM offerings, comply with the strictest requirements and regulations, and continuously drive and exceed satellite communication technology performance standards.
